Chapter 1

Preface
1.1 Regulations Information

- CE compliance

This device is classed as a technical information equipment (ITE) in class B and is intended for use in living room and office. The CE-mark approves the conformity by the EU-guidelines:

- EMC Directive 2014/30/EU,
- Low Voltage Directive 2014/35/EU(equals A2 : 2013) ,
- RF Directive 2014/53/EU

SAR/DAS refers to the rate at which the body absorbs RF energy. The SAR limit set by the ICNIRP Guidelines is 2.0 W/kg(10g). Testing for SAR is conducted using standard operating positions accepted by the EN standard.

During testing, the radio is set to its highest transmission levels and placed in positions that simulate use against the body.

This product is compliant with ICNIRP Guidelines with respect to Electromagnetic Fields (EMF) which specifies a Specific Absorption Rate (SAR) limit of 2W/kg. DAS*/SAR: 1.9 W/kg (corps/body)
Rechargeable Battery Notice

Do NOT

1. Throw into fire or a hot oven, or mechanically crush or cut a battery
2. Throw or immerse into water
3. Heat to more than 60°C
4. Attempt to repair or disassemble
5. Leave in an extremely low air pressure environment
6. Throw the battery at your friend's head
7. Leave in an extremely high-temperature environment

The unit can be operated at an ambient temperature of max. 35°C (95°F). Do not subject it to temperatures below 5°C (41°F) or above 40°C (104 °F).

CAUTION: RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO SAFETY REGULATIONS IN YOUR STATE.

PREVENTION OF HEARING LOSS

CAUTION: Listening to music at high volume levels and for extended durations can damage one’s hearing. In order to reduce the risk of damage to hearing, one should lower the volume to a safe, comfortable level, and reduce the amount of time listening at high levels. Headsets should comply with EN 50332-2 requirements.
FCC Information

FEDERAL COMMUNICATIONS COMMISSION INTERFERENCE STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the manufacturer or an experienced radio/TV technician for help.
RF Exposure Information (SAR)

This device meets the government’s requirements for exposure to radio waves. This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC with the EUT transmitting at the specified power level in different channels.

The FCC has granted an Equipment Authorization for this device with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this device is on file with the FCC and can be found under the Display Grant section of www.fcc.gov/eot/ea/fccid after searching on FCC ID: 2AKHFA200NG.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

CAUTION: Any changes or modifications not expressly approved by the manufacturer of this device could void the warranty if damage is determined from any form of modification. You better check yourself before you wreck yourself!
1.2 Safety Instructions

1. Do not apply heavy pressure to the computer or subject it to any form of strong impact as this can damage the computer's components or otherwise cause it to malfunction.

2. Never cover or block the air vents including those located at the base of the computer. Never cover your computer or AC adapter with any object.

3. To keep your computer in prime operating condition, protect your work area from direct sunlight.

4. Do NOT expose to or use near liquid, rain, or moisture. It is highly recommended to use a surge protector, especially during a storm.

5. Do not use or expose this device around magnetic fields as magnetic interference may affect the performance of the device.
1.3 Important Warranty Void Notice

**WARNING:** Damage caused by any modification to the thermal system performed by anyone other than Eluktronics will not be covered under warranty. As a standard, the Prometheus XVII is produced with an advanced thermal design which provides excellent heat dissipation. It is strongly discouraged to attempt any thermal changes on your own. The stock thermals are already designed for you to enjoy a very high-performance experience.

**NOTE:** Upgrading memory and/or storage can be easily accessed and modified on your PC. However, modifying your thermals is **NOT** worth the serious risk of voiding your warranty or more importantly damaging your PC. An accidental bend of the heatsink or incorrect torque of the screws would be counteractive to the advanced compound you might apply. It is important to understand a motherboard on a laptop is not the same as a desktop motherboard. The processor and graphics card are both soldered on to the board and a replacement would be extremely costly if damage were to occur. If you believe the system is not operating as it should, please consult with our technical service department.

Chapter 2

Getting to know the basics
2.1 Product Specification

This User’s Manual provides technical information of instructions and illustrations on how to operate this notebook for the customer. Please read this manual carefully before using this notebook.

- **Physical Characteristic**

  - **Dimension**
    - 392.9*260*24.9mm
    - 2.55kg +/- 5%

- **CPU**

  - **Supported Processor**
    - AMD Renoir-H Series CPU
    - AMD Cezanne-H Series CPU

- **GPU**

  - **Supported Graphics**
    - NVIDIA GN20-E3, 192bits
    - NVIDIA GN20-E5, 256bits
    - NVIDIA GN20-E7, 256bits

- **Memory**

  - **RAM**
    - DDR4 3200MHz

- **Display**

  - **LCD**
    - 17.3" Narrow, 16:9 FHD or QHD (Optional)
    - FHD: 1920*1080
    - QHD: 2560*1440
### I/O Port

- **DC-in**: x 1
- **USB**
  - USB Type A @Right side x2: USB 3.1 (Gen1) X2  
  (Power off mode support USB power, but w/o bc1.2 protocol)
  - USB Type A @Left side x1: USB 3.1 (Gen2) X1  
  (Power off mode support USB power, but w/o bc1.2 protocol)
  - USB Type C x1 @Rear side x1: USB 3.1 Gen2 + DP  
  (Power off mode support USB power, but w/o bc1.2 protocol)
- **RJ45**: x 1
- **HDMI 2.1**: x 1
- **Audio out & Mic in**: x 2
- **Card reader**: x 1  
  USB3 interface, SD/SDHC/SDXC, UHS-I speed  
  Connector: Full SD size

### Audio

- Audio Codec Realtek ALC274CG / Codec: Realtek ALC1306-CGT
  - *Azalia standard support*
  - *D3 mode support*
  - *Smart AMP support*

- **Speaker/MIC**
  - *Two integrated speakers*
  - *THX Spatial Audio*
  - *Digital Microphone support*
**Webcam**

- Infrared capability for facial recognition camera
  1. IR Camera with two dedicated microphones

**Communication Port**

**LAN**

- Supports 10/100/1000/2500Mb/sec
- PCI-E interface
- Power Down Mode D1~D3 support
- PCIe ASPM L1.1, L1.2 support
- UI for network package management

**Wireless LAN +BT**

- M.2 2230 w/ CNVI interface (Intel WiFi6 AX200)
- IEEE802.11 a/b/g/n/ac/ax support
· **Input**

- **Keyboard**
  
  Membrane KB
  340*109.2*3.6mm/single zone RGB Backlight

- **Pointing Device**
  
  TDB5297
  Outline: 154*100* 0.6 mm
  AA: 150*94.6 mm
  Mylar
  Enable/Disable area :10mmx10mm
  Palm Rejection: Supported

· **Power**

- **AC Adapter**
  
  Automatic Voltage adjustment between 100 and 240VAC 50/60Hz,
  230 Watts (19.5V/11.8A), 3 Pins

- **Battery**
  
  Li-polymer Battery, SW Gas Gauge IC, soft pack,
  1. 4 cells (4S1P 4100mAh) 62.32Wh

---

**NOTE:** MODEL IS DESIGNED TO BE USED WITH DC INPUT:

230 Watts, (19.5V/11.8A) - THE USE OF ANYTHING LOWER CAN CAUSE DAMAGE TO HARDWARE
2.2 Preparing your Computer

A Connect the AC adapter’s DC output plug to the DC IN jack.

B The display panel can be opened to a wide range of angles for optimal viewing.

C Press the power button to turn on your notebook computer.
2.3 Product Overview

Please become familiar with each component before you operate the computer.

Top-Open View
1 Camera Status LED
The Camera Status LED helps you see whenever the camera is powered on.

2 Upright Camera
A device that allows you to record video or take photographs with your computer. This used to be located at the bottom of the screen and was great for realizing it's time to cut your nose hair.

**Infrared capability for facial recognition camera**
can be used to identify and authenticate user to unlock notebook, conduct payment and other security functions.

3 Microphone
Built-in microphones.
IR CCD MIC*2

4 LCD screen
Internal display of your notebook computer.

5 Power modes & way to tell the level you're in based on LED
Beast mode: Both White (All lights)
Gaming mode: White (Bottom light)
Office mode: OFF

6 Power Button
Press this button to turn the computer's power on or off.

---

**TIP:** The power button should be pressed for 2-3 seconds to power the system on. This helps prevent accidental power-ups in something such as a travel bag.
7 **Power/Battery/Caps Lock LED Indicator**

- Power ON: White
- Suspend: Blinking White
- Power Off: OFF
- Charging: Blinking White
- Battery Low (<6%): Blinking Amber
- Charging finish: OFF

Caps Lock Status LED
Default: ON (White)

8 **RGB Light bar**

Smart lighting color control of your Light Bar.

9 **Keyboard**

The keyboard provides keys with comfortable travel

10 **Touchpad/Click pad**

Touch-sensitive pointing device which functions like the mouse.

11 **Touchpad LED Indicator/ Touchpad switch**

- Please refer to the description at the end of the manual
Card Reader
USB3 interface, SD/SDHC/SDXC, UHS-I speed
Connector: Full SD size

USB Port (Gen1)
Connects a USB device (such as a Flash drive, keyboard or mouse) into this jack. With charging function.

Vents
The thermal vents are designed to cool the internal components and avoid overheating. These should not be blocked.
Left Side View

1. **Vents**
   The thermal vents are designed to cool the internal components and avoid overheating.

2. **USB Port (Gen2)**
   Connects a USB device (such as a USB flash drive, keyboard or mouse) into this jack. With charging function.

3. **Mic-In Jack**
   Connect a microphone into this jack.

4. **Audio-Out Jack**
   Connects amplified speakers, headphones or microphone into this jack.
**Bottom Side View**

1. **Vents**
   The thermal vents are designed to cool the internal components and avoid overheating.

2. **Speakers**
   Enjoy some tunes.

**CAUTION**: To prevent the possibility of heat-related injuries or overheating the computer, it is recommended to use the computer on a hard, flat surface.
Compartment View
Front Side View

Back Side View

1. **Vents**
   The thermal vents are designed to cool the internal components and avoid overheating.

2. **Kensington® Lock Port**
   To be secured using Kensington® Lock Port security products.
3 **USB Type-C Port**
USB Type-C / DP / USB Power Delivery - Does not support charging of the PC.

4 **HDMI port**
Connect to an external monitor, or home theater system.

5 **Network Jack**
This jack lets you connect to a LAN.

6 **Power Connector**
Connects the AC adapter into this connector.
Chapter 3

Getting started
3.1 AC Adapter

It is recommended to connect the AC adapter and use the AC power for your first use to allow the battery to completely charge. Connect the AC adapter when you need to charge the battery or you want to operate from AC power.

CAUTION: The use of inferior extension cords may result in damage to your notebook. Your notebook comes with its own authorized AC adapter. Use of a different AC adapter with lower wattage or cable extension which is not authorized for use will void warranty protection if damage to hardware is found in association to said adapter or extension cable.

NOTE: The power adapter can become hot when in use. Please be sure the AC adapter is not covered with any materials and keep it away from exposed parts of your body.
3.2 Knowing the Keyboard

The following defines the colored hot keys on the Keyboard.

The colored commands can only be accessed by first pressing and holding the function key while pressing a key with a colored command.
### 3.2.1 Keyboard Functions

To activate these functions, press the hot key associated with the desired function as below:

#### Function Keys

https://support.microsoft.com/en-us/
3.3 Using the touchpad / clickpad

The touchpad / clickpad is a rectangular electronic device located just below your keyboard. This is a very large touchpad and is the first to offer the ability to disable half of the touchpad to better assist you with typing based on how your hands may lie. Tap the left corner twice to enable or disable the entire touchpad. Tapping the right corner twice will enable or disable the right hand side of your touchpad. You can use the static-sensitive panel of the touchpad / clickpad and slide it to move the cursor. You can use the buttons below the touchpad as left and right mouse buttons.

Press the left and right buttons located on the edge of the touchpad / clickpad to make selections and run functions. These two buttons are similar to the left and right buttons on a mouse. Tapping on the touchpad / clickpad produces similar results.

• Tap the left corner twice to enable or disable the entire touchpad functionality.

• Tap the right corner twice to enable or disable the right half of the touchpad.

• No LED light on the left or right, the touchpad can be used in all areas.
Chapter 4

BIOS setup
4.1 About BIOS Setup

4.1.1 When to Use BIOS Setup?

You may need to run the BIOS Setup when:

- An error message appears on the screen during the system booting up and is requested to run SETUP.
- You want to change the default settings for customized features.
- You want to reload the default BIOS settings.

4.1.2 How to Run BIOS Setup?

To run the BIOS Setup Utility, turn on the notebook and press the [Del] or [F2] key during the POST procedure.

If the message disappears before you respond and you still wish to enter Setup, either restart the system by turning it OFF and ON, or simultaneously pressing [Ctrl]+[Alt]+[Del] keys to restart.

The screenshots and setting options in this chapter are for your references only. The actual setting screens and options on your notebook will likely be different because the CEO at Eluktronics is the man and he tries his best to find ways to safely provide a more exciting PC experience for you.

The setup function only can be invoked by pressing [Del] or [F2] key during POST that provide a approach to change some settings and configuration based on your preference. The changed values will save in the NVRAM and will take effect after the settings are saved and system is rebooted. The setup uses a menu interface to allow the user to configure the system and the features.

Press the [F7] key during the boot process to access the Boot Menu.
4.2 BIOS Setup Menu

Once you enter the BIOS Setup Utility, the Main Menu will appear on the screen. Select the tags to enter the other menus.

Main Menu

Shows the system overview about memory size and the system time and date. This page contains your BIOS and EC version which may be something our support staff will ask you for in the event you’re encountering a technical issue.

Advanced Menu

Select additional special options.

Security Menu

Install or clear the password settings for supervisor and user.

Boot Menu

Configure Settings during System Boot.

EXIT Menu

Save or discard the changes before leaving the BIOS Setup Menu.
4.2.1 Main Menu

</tr>
</tbody>
</table>

- **Key Management**

#### Change Administrator Password

When this item is selected, a message box shall appear on the screen as below:

![Enter New Password](image)

Type a maximum of 20-digit password and press [Enter].

The password typed now will replace any previously set password from CMOS memory. You may also press [ESC] to abandon new password setting. It is extremely important to keep record for any BIOS password which is set as it cannot be reset even with the removal of a CMOS battery for the security of your PC.
Select Change User Password to give or to abandon password setting same as Change Administrator Password item above.

Note that Administrator Password field allows users to enter and change the settings of the BIOS SETUP UTILITY, while User Password field only allows users to enter the BIOS SETUP UTILITY without having the authorization to make any changes.

The Password Check item is used to specify the type of BIOS password protection that is implemented.

To clear a set Administrator Password/User Password, just press [Enter] under Change Administrator Password/Change User Password field when you are prompted to enter the password. A message box will pop up confirming password will be disabled. Once the password is disabled, the system will boot and user can enter setup without entering password.

Key Management:

Enables expert users to modify Secure Boot Policy variables without full authentication.
4.2.4 Boot Menu

- **Boot Configuration**
  Configure Settings during System Boot.

- **Set Boot Priority (1st/2nd/3rd/..... Boot)**
  Specifies the boot sequence from the available devices.
  A device enclosed in parenthesis has been disabled in the corresponding type menu.

- **Hard Disk Drive / USB HardDisk Drive**
  Specifies the Boot Device Priority sequence.

---
